

Transform your document processes with Synappx™ Cloud Capture.

Next generation intelligent document processing solution, powered by AI

Automate processes and unlock the value of business-critical data.

Managing documents shouldn't slow down your business. Synappx Cloud Capture, the next generation Intelligent Document Processing solution from Sharp, helps automate manual business processes for improved productivity, accuracy, and security.

Manual, repetitive processes can be a significant drain on overall business efficiency. Capturing documents, and extracting key information from them, is often labour-intensive, time-consuming and prone to human error - particularly when it comes to manually keying information. While legacy systems using Optical Character Recognition (OCR) and zones to identify data are an improvement, these can be costly to setup and maintain, and sometimes inaccurate.

Powered by AI automation, Synappx Cloud Capture changes the game for business productivity, transforming manual document processes to efficient digital processes. It turns paper forms, documents, and digital files into structured, searchable business data. In doing so, it allows you to reduce costs and errors while speeding up document management workflows - all while maintaining compliance.

Version 1.0

Using the Blueprint Designer, assisted by AI, administrators can define extraction rules, field definitions, confidence levels and output formats to automate document processing.

How Synappx Cloud Capture works.

Overcome inefficiencies and errors associated with manual document processes.

Synappx Cloud Capture solves the challenge of slow, error-prone and expensive processes. Using next generation AI capabilities, the solution captures, classifies, and extracts data from all types of business documents, preparing them for import into line-of-business systems such as accounting.

From invoices, contracts and HR forms to delivery notes, expense reports and timesheets, Synappx Cloud Capture can flexibly process all types of business document. The end-to-end application helps accelerate document-based processes in just three steps:

See real business impact.

Expect tangible, long-term benefits across a range of business areas with Synappx Cloud Capture.

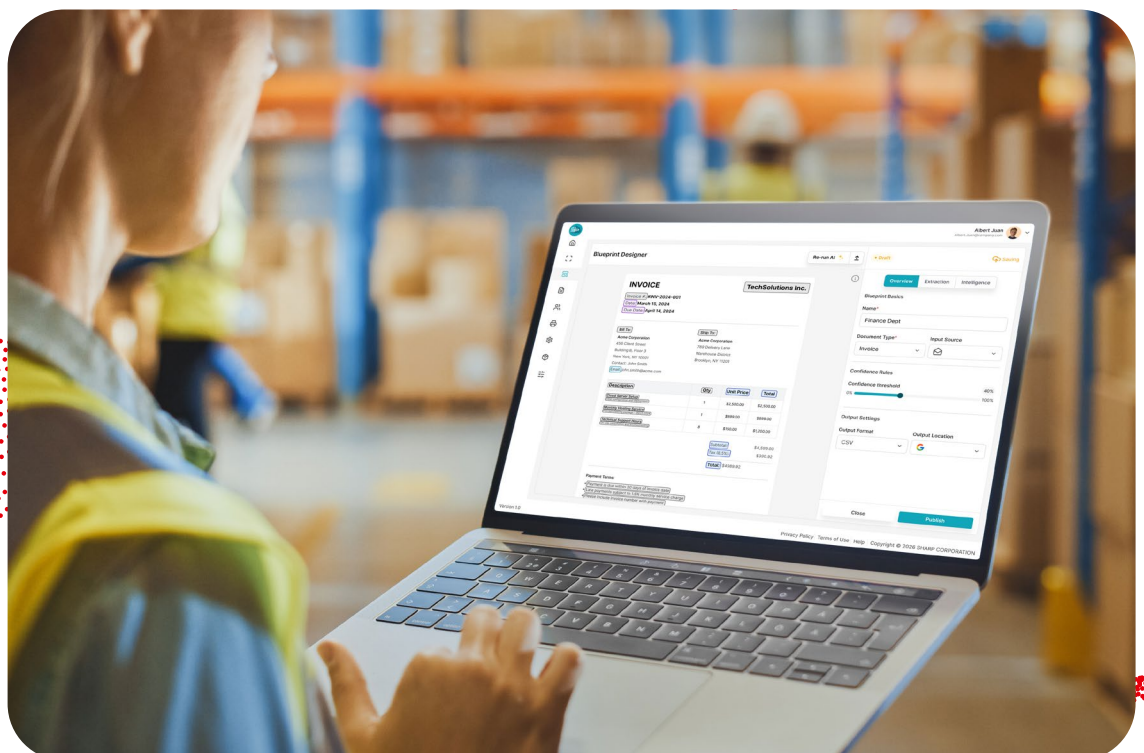

When it comes to processing paper documents, Synappx Cloud Capture is optimised for Sharp MFPs and is compatible with a wide range of scanners. And that's not all - digital documents can automatically be captured from and output to a wide range of sources:

- Email
- Watched folders
- Teams
- SharePoint
- OneDrive
- Google Drive
- And more

Via the Synappx Cloud Capture portal, you can create bespoke document blueprints to build automated extraction processes, including AI data discovery and output formatting. Extraction confidence can be set, and, in the case of AI uncertainty, documents are automatically forwarded to assigned reviewers for verification and approval. The portal also enables management of users, devices, licenses, extraction processes and more. You'll also have access to a system dashboard, as well as audit and reporting functions, for full compliance and visibility.

Do more with less

From invoice processing and HR onboarding to contract management and compliance documentation, Synappx Cloud Capture uses automation to reduce manual repetitive tasks. This frees up your employees to focus on higher-value work, while also reducing overhead for IT managers.

After AI data extraction is complete the system can automatically flag any items, where conversion confidence falls below the pre-defined setting for human review.

Integrate then scale, seamlessly

Synappx Cloud Capture creates documents in the right format for your existing cloud ERP, CRM, and other core line-of-business items, making implementation as simple as possible. And, when your business is ready to scale and take on increasing volumes of information, the solution makes this happen without the need for more staff.

Stay accurate, secure, and compliant

By improving data quality through AI data recognition, and data validation tools, Synappx Cloud Capture reduces the risk of errors. In addition, automatic extraction of the right data, no matter the document format, offers peace of mind that information is being managed accurately.

You can also feel at ease when it comes to security and compliance. Synappx Cloud Capture is built on the zero-trust security framework, ensuring documents digitally stored are searchable, secure, and compliant with audit and regulatory requirements.

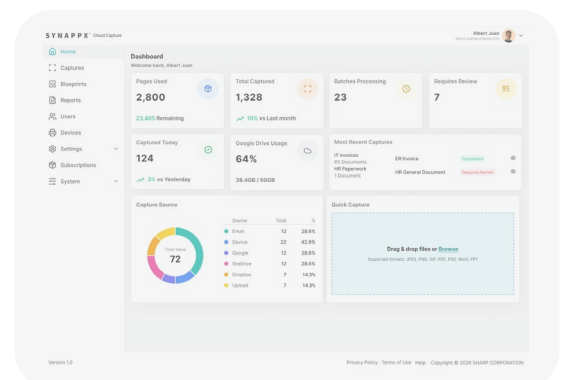

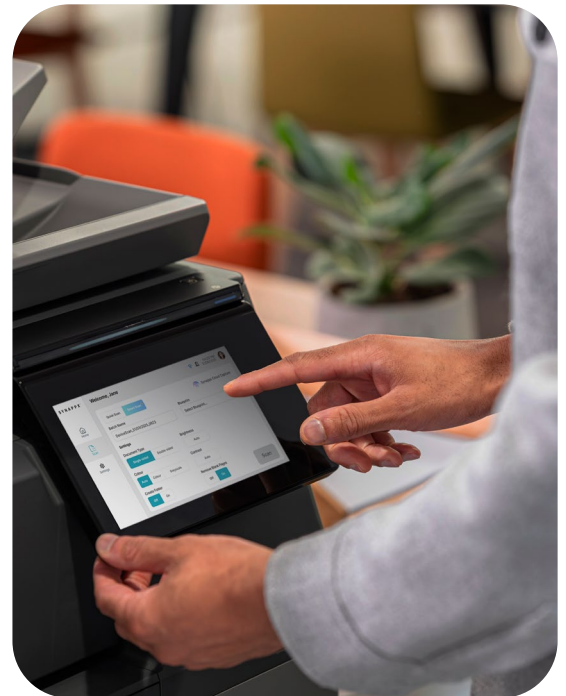

Get help going green

Reducing paper usage and manual handling is key to creating more sustainable operations. Synappx Cloud Capture supports paperless workflows, minimises printing and storage requirements, and helps you transition to digital-first processes. By automating document capture and routing, you can reduce waste, improve efficiency, and lower operational costs.

Cut down on costs

Synappx Cloud Capture helps you reduce costs by converting to digital processes in highly efficient, centralised cloud data centres, ultimately helping cut document management costs - as well as storage and administrative expenses.

Deployed in the cloud with a flexible subscription model, Synappx Cloud Capture helps you avoid large upfront investments - so you can benefit from the cost savings straight away. Automated document processing, reduced manual data entry, and streamlined workflows contribute to significant cost savings across your finance, HR, operations, and customer service teams and more.

Synappx Cloud Capture dashboard analytics delivers a comprehensive view of platform activity, allowing admins to monitor capture volumes, analyse processing trends, and evaluate workflow performance to drive document automation efficiency.

Automating document and invoice processing.

Whatever the workflow, automating with Synappx Cloud Capture can drive benefits for your business.

IT Managers

-  Reduced IT overhead
-  Standardising document flow
-  Security & compliance reduce the risk with audit logs and access controls
-  Scalable without increasing IT personnel
-  Futureproofing with support for AI-powered document processing

Business owners

-  Cost efficiency through automated invoice processing software
-  Compliance confidence
-  Improved decision-making with faster access to data
-  Customer experience improvements via faster response times

Finance & HR teams

-  Invoice automation automated invoice capture software for enhanced efficiency
-  Paperless processes and digital document capture
-  Payroll improved accuracy

The future of document management has arrived.

Synappx Cloud Capture is the AI-powered, next-generation document processing solution that enables you to forget the inefficiencies and errors associated with manual processing.

By taking on the repetitive tasks that slow down your everyday, you can focus on higher value work and making better-informed decisions.

Synappx Cloud Capture is part of Sharp's Synappx™ productivity suite of cloud applications. Deployed in the Sharp Services Platform, Synappx Services help make collaboration, document and device management easier than ever.

Ready for the next generation of intelligent document processing?

Welcome to Sharp

Sharp Europe helps organisations thrive in a rapidly changing working world. Through connecting people and technology, we deliver trusted, tailored solutions for the workplace and public spaces that increase efficiency and enhance performance, while freeing up our customers to focus on what they do best.

Sharp Europe has a portfolio ranging from printers and advanced display technologies, through to IT Services and collaboration platforms like our Synappx Services.

Sharp Europe is investing and leading the industry in new areas of technology. As our customers' needs shift, we are the perfect partner to connect them to the technology that will drive their business forward.
